

Scan

Scan or type a barcode (7 digits) then Enter. Lookup and validation are formula-driven — no VBA.

Scan

Scan / type barcode:

Status:

EMPTY

Lookup result (formula staging)

Barcode	ContainerID	ProductID

Container detail

Container ID	
Barcode	
Product	
Batch / Lot	
Status	
Location	
Expiry	
Expiry class	
Opened	
Duplicate flag	

Validation & allowed next actions

Allowed next actions	
Blocking conditions	Scan a barcode

Workflow (interim manual mode): scan → review card → perform transaction on Containe
Scanner: USB keyboard wedge, Enter suffix, Code 128 labels.

ProductName	BatchLotNumber	ExpiryDate	StorageLocationID	LocationName	Status	OpenedDate

rs/Transactions sheets. VBA phase adds atomic commit + scan reset/focus.

ExpiryClass	Duplicate Flag	LookupState
NoExpiry		EMPTY
